Technical Skills

Languages: Python, C++, X++, JavaScript, MySQL

Technologies/Frameworks: FastAPI, Langchain, CrewAI, NodeJs, Tensorflow, Scikit-learn, Docker, AWS, ML

Experience

FastPace Dynamics

Feb 2026 – May 2026

Software Engineer Intern

Karachi, Pakistan

- Completed structured training in **Microsoft Dynamics 365**, gaining hands-on experience with core modules, system navigation, and enterprise-level **CRM/ERP functionalities**.
- Developed a solid understanding of **CRM principles**, including customer data management, system customization, and automation of business processes.
- Worked extensively with **backend workflows** in Finance and Operations, assisting in configuring, testing, and optimizing business logic to support organizational needs.
- Designed, implemented, and facilitated workflow solutions for international clients, ensuring alignment with business requirements and improving process efficiency across regions.

MCB Bank Limited

Jan 2026 – Feb 2026

IT Management Trainee

Karachi, Pakistan

- Collaborated with the **ESB (Enterprise Service Bus)** team to design and develop banking services, contributing to system integrations and enabling seamless communication between core banking applications.
- Supported the **Information Security team** in monitoring and evaluating security controls, including access management, threat mitigation, and adherence to internal security policies.
- Analyzed complex **banking workflows** to understand core financial operations, system integrations, and service delivery processes within a regulated banking environment.

Projects

Vigilant Driver: AI Based Driver Monitoring and Assurance System | [Link: Vigilant.AI](#)

May 2026

- * It's a full-stack fleet safety platform (FastAPI backend, React/Vite dashboard, React Native driver app) that monitors sessions and triggers safety alerts.
- * Includes an AI pipeline (Bi-LSTM-based fatigue/distraction classification and on-device inference) to classify driver drowsiness/distraction in real time. It includes ML training components and an AI advisor service, enabling companies to monitor drivers, manage vehicles, review sessions/events, and act on safety alerts.

Automated Newsroom (Faxum Press) - Agentic AI | [Link: Github](#)

June 2026

- * Built an Agentic AI-powered newsroom platform using FastAPI, LangChain, and Gemini LLM that auto-fetches and displays trending news for 28 countries without any user input, mirroring the behaviour of Google News and BBC.
- * Implemented a RAG pipeline using HuggingFace embeddings and ChromaDB to enable context-aware over live news articles. Designed an agnostic LLM layer that abstracts the AI vendor so the entire system can switch from Gemini to any LangChain compatible model.

Education

FAST - National University Of Computer and Emerging Sciences

Aug 2022 – June 2026

Bachelor of Science in Computer Science

Karachi, Pakistan

Significant Achievements

- Hold Multiple Certificates of Competitive Programming, FAST-NUCES
- Winner Data Science Competition, FAST NUCES

Certifications

- | | |
|---|-----------------|
| * Microsoft Power Apps & Automate | Microsoft |
| * Large Language Models (LLMs) Concepts | DataCamp |
| * Muti-AI Agent Systems with CrewAI | DeepLearning.AI |
| * Google AI Essentials | Coursera |
| * LangChain for LLM Application Development | DeepLearning.AI |
